Kami Lynch, City Clerk

Summary of intent for RESOLUTION #6-R-22

RESOLUTION #6-R-22 calls for the immediate addition of a "Revitalization of Soldier's Square" project to the 5-year CIP and asks that the City move with reasonable speed to initiate an RFP process, once resolution is approved.

It does NOT identify nor request any specific sources of funding for the project.

RESOLUTION #6-R-22

Adding the Revitalization of Soldier's Square project to the 5-year CIP

Submitted By: Alderperson Schultz – District 9, Alderperson Del Toro – District 4 Date: April 20, 2022 Referred To: Municipal Services Committee

WHEREAS; Resolution #5-R-19, passed by Common Council in January of 2020, called for the City of Appleton to commit to an effort to revitalize Soldier's Square and recapture the former function of the hallowed space without prohibiting any future ancillary development and without unduly impacting present parking and traffic movement in the Square; and

WHEREAS; The passage of that resolution also approved the restoration delay and potential relocation of the Spanish-American War Memorial, currently in Pierce Park, in any foreseeable future redevelopment plans of Soldier's Square, as well as affording the opportunity to have more recent conflicts memorialized without any direct cost to the City of Appleton, and

WHEREAS; the City approved and partially completed the full restoration of the Civil War memorial in Soldier's Square in 2021, with the scheduled completion in 2022, and has acquired and possesses, in partnership with Sculpture Valley, replacement cannon and an original USS Maine plaque, essential components of a full restoration of the Spanish American War Memorial; and

WHEREAS; the recovery of the previously occupied space by the former parking structure has now visually separated the utilitarian garbage and recycle enclosure from the new YMACA ramp, visually positioning it and an island the heart of newly adjusted and recovered space of Soldier's Square, and

WHEREAS; an evaluation of the Soldier's Square area with City staff and stakeholders in late 2021 initiated conversations about potential improvements to the layout to create a partially revitalized Soldier's Square which might affect only a bare minimum number of exiting parking stalls while allowing for the relocation of the Spanish-American War memorial; and

WHEREAS; Soldier's Square, was meant to provide a place of solace and contemplation, where our memorials could be appreciated for their aesthetic and symbolic value beyond their intrinsic commemorative purpose, and complement the mission of the civic spaces in which they reside by connecting us and causing us to reflect on something larger than ourselves;

NOW THEREFORE, BE IT RESOLVED;

That "Soldier's Square", for the purposes of this Resolution, shall be defined as that portion of right of way approximately 80' by 365' in size, bounded by the following: South of College Avenue, West of Morrison Street, North of Lawrence Street, and East of Oneida Street; and

BE IT FURTHER RESOLVED;

That the City of Appleton immediately add the "Revitalization of Soldiers Square" project to the 5YR CIP and move with reasonable speed to initiate the RFP process to begin the design phase for revitalizing Soldier's Square.

MEMO

"...meeting community needs...enhancing quality of life."

DATE:	May 3, 2022
FROM:	Paula Vandehey, Director of Public Works
TO:	Municipal Services Committee

City staff was directed to develop estimates for a possible short-term Soldiers Square Plan (Option 1) and a possible long-term Soldiers Square Plan (Option 3). Below are rough estimates and assumptions for each potential option. A more refined cost estimate will be developed after Council approves a design through the public design hearing process.

Possible Short-Term Plan (Option 1)

Assumptions:

- > YMCA installs sidewalk adjacent to new parking ramp as part of their project.
- Cost estimate includes a combination of grass area and colored/stamped concrete.

Cost Estimate:

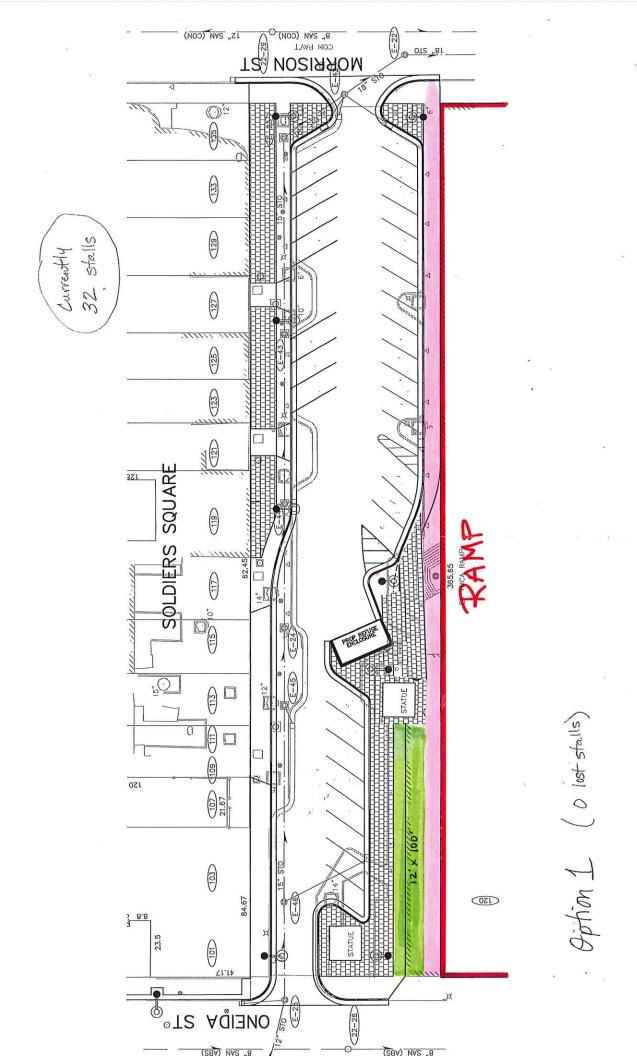

▶ \$25,000

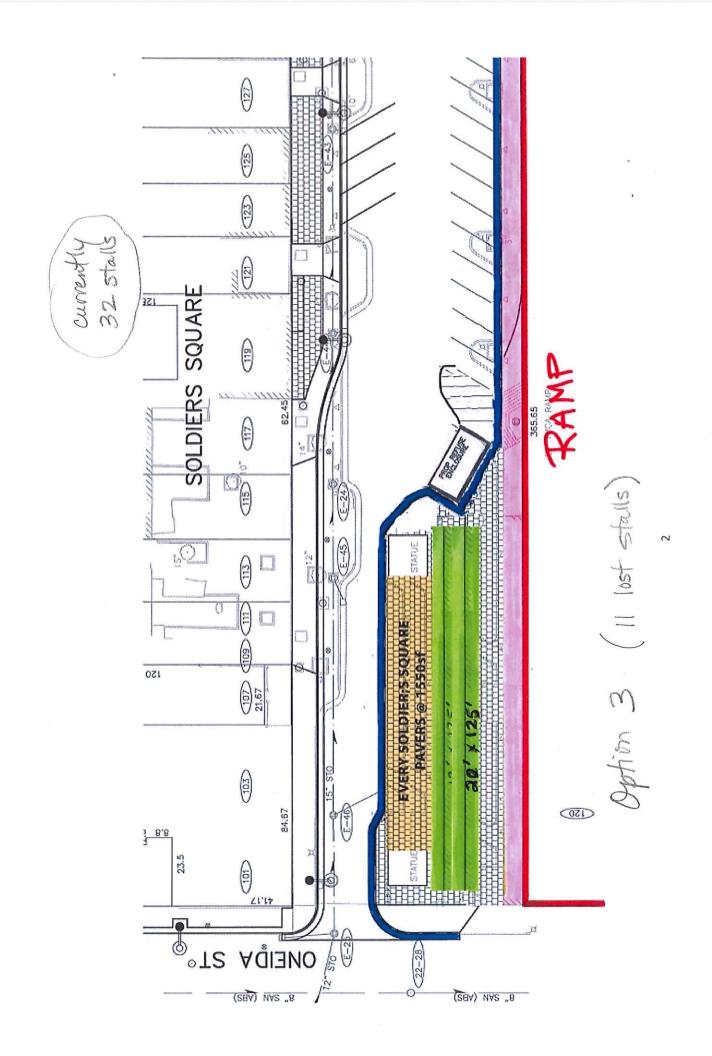

Possible Long-Term Plan (Option 3)

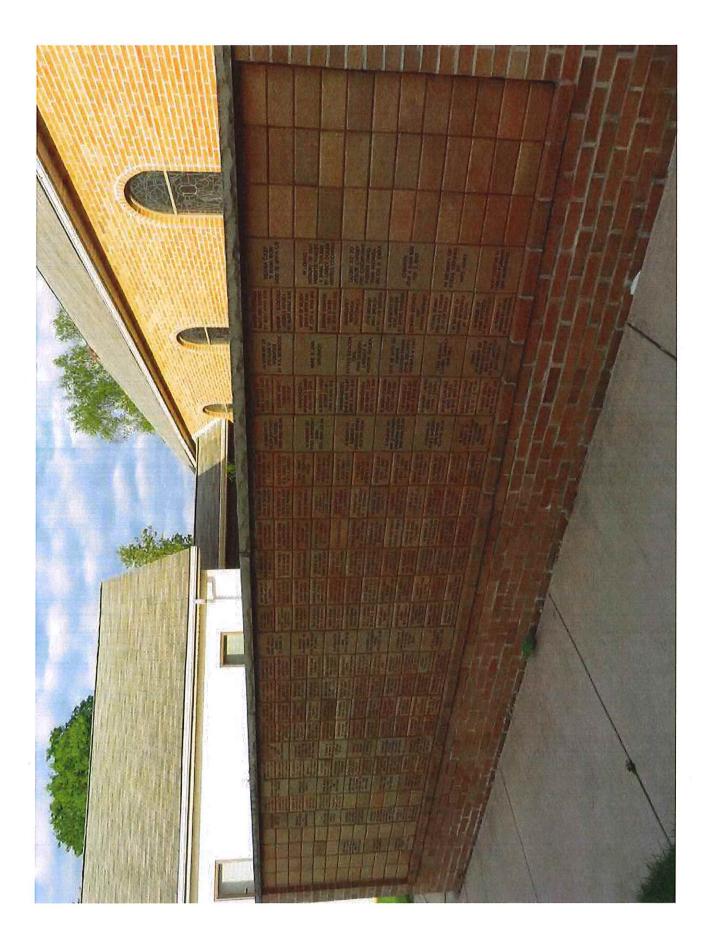

Assumptions:

- Cost estimate does not include bricks as staff does not support the use of bricks as a pavement/sidewalk surface within a street right-of-way. Other options such as a brick wall could be considered (see attached example).
- > Cost estimate does not include relocating other monuments to this site.
- Cost estimate includes a combination of grass area and colored/stamped concrete.
- > Cost estimate includes construction of new dumpster enclosure.
- Cost Estimate:
 - ⋟ \$210,000

Attachments

Approved 3/20/13 6/01/22

CITY OF APPLETON SIDEWALK INSTALLATION POLICY

This policy has been developed to provide pedestrian safety and convenience throughout the City of Appleton. Providing a walkable city also promotes a sense of community, provides for safe recreation and exercise, and reduces traffic congestion, pollution, and noise.

I. NEW SUBDIVISIONS

Property owners in new subdivisions will be notified at time the occupancy permit is issued that they have six months to install sidewalk.

Sidewalks, not previously installed by property owner within six months of occupancy, will be installed under city contract, with the cost of installation assessed to the property owner per the Special Assessment Policy.

At locations where sidewalks are required to be wider than 5 feet (i.e., sidepaths), the installation of sidewalks will be performed under City contract at the time of concrete street paving, with the cost of installation assessed to the property owner per the Special Assessment Policy.

Vacant lots will have sidewalk installed as part of the Concrete Street Paving Program.

II. ESTABLISHED NEIGHBORHOODS (PRIOR TO 1992)

Sidewalks shall be installed when one of the following conditions is met:

A. Arterial & Collector Streets

Sidewalks shall be installed on both sides of all arterial and collector streets in accordance with the Five-Year Sidewalk Plan adopted by Common Council.

B. Local Streets

- 1. Sidewalks shall be installed along any residential property when a specific need is demonstrated and approved by Common Council.
- 2. Sidewalks shall be installed along the one side of any residential block in which sidewalks exist along 50% of that side of that block.
- 3. Sidewalks shall be installed on all streets, within 1/2 mile, leading directly to

elementary and middle schools and other major pedestrian generators as demonstrated and approved by the Common Council. The city will work with the School Districts to provide safe walking routes.

4. Sidewalk shall be considered for installation, where they currently don't exist, when streets are reconstructed.

III. EXISTING SIDEWALK

No existing sidewalk may be removed or abandoned without Common Council approval.

IV. ANNEXED AREAS

Sidewalks shall be installed in newly annexed areas at the time the streets are constructed to urban sections.

V. NEW NON-RESIDENTIAL SITE PLANS

Sidewalks shall be installed by the site owner in conjunction with the facility construction on non-residential properties.

VI. INDUSTRIAL PARKS

Sidewalks shall not be required within a City of Appleton Industrial Park unless a specific pedestrian need is demonstrated.

VII. CITY PARKS

Sidewalks or alternative pedestrian pathways shall be installed along or within City Parks where there is a demonstrated need and subject to review by Park and Recreation Committee and subsequent consideration by Municipal Services Committee and final approval by the Common Council.

VIII. MISCELLANEOUS ISSUES

Sidewalks shall be installed along all blocks that lead to all-way stop controlled and signal controlled intersections.

IX. CHANGES TO POLICY

This policy shall not be revoked or substantively modified unless:-approved by the Common Council.

- A. The city published notice of the initial Committee meeting (date, time and location) at which action may be taken to revoke or modify the policy.
- B. Such notice shall expressly notify the public that the policy will be reviewed at the meeting.
- C. The notice shall be published in the AppleSource or at least twice in the local newspaper in an ad not smaller than 4 inches by 4 inches (including a weekday edition and a weekend edition) within 7 days immediately preceding the meeting.
- D. Any revocation of/or modification to the policy must be approved by the Common Council.

To: Finance Committee City of Appleton Common Council

From: Ronald C. McDonald, General Manager

Subject: Approve budget amendment for the 2022 Transit Center Needs Assessment and Master Plan project.

Background:

Valley Transit's Transit Center is located at 100 E. Washington Street in downtown Appleton. The Transit Center was constructed in 1989 and is approximately 5,700 square feet. In concert with the College North Neighborhood Plan, Valley Transit is hiring an architectural firm to conduct a site assessment and create a master plan for the Transit Center facility in accordance with Federal Transit Administration Guidelines. The Master Plan will be the basis used to obtain federal funding for a future Joint Development Transit Center Project.

The FTA provides capital funds as an 80/20 grant; 80% grant funded and 20% local match. The local share will be paid through a combination of existing local share and Valley Transit's depreciation fund. The costs associated with this grant are as follows:

80% funding from FTA:	\$143,480
20% local match:	<u>\$ 35,870</u>
Total eligible project cost:	\$179,350

Recommendation:

Approve budget amendment for 2022 Transit Center Needs Assessment and Master Plan project in the amount of \$179,350.

PARKS, RECREATION & FACILITIES MANAGEMENT Dean R. Gazza, Director 1819 East Witzke Boulevard

Appleton, Wisconsin 54911-8401 (920) 832-5572 FAX (920) 993-3103 Email - <u>dean.gazza@appleton.org</u>

- TO: Fox Cities Transit Commission
- FROM: Dean R. Gazza, Director, Parks, Recreation and Facilities Management
- DATE: 5/24/2022
- RE: Action Item: Award the Design Contract for the "2022 Transit Center Needs Assessment and Master Plan" to LHB Corporation in the amount of \$163,043.75 plus a 10% contingency of \$16,305 for a total not to exceed a project design cost of \$179,348.75.

PROJECT

The 2022 Valley Transit budget has allocated monies to perform a needs assessment and create a master plan for the Transit Center facility all in accordance with all Federal Transit Administration Guidelines. This Master Plan will be the basis used to obtain federal funding for a future Joint Development Transit Center Project. This memo addresses selecting a consultant to perform a needs assessment and create a Master Plan for the Transit Center Joint Development Facility Project.

BACKGROUND

Located at 100 E. Washington Street, the existing site is appropriately located in downtown Appleton and consists of approximately one acre. Existing improvements include bus parking and the Transit Center facility. The Transit Center facility was constructed in 1989 and is approximately 5,700 square feet. This project will incorporate a new Transit Center with improved services and safety, and a public and private development featuring a mix of commercial and residential uses, public open spaces which are thoughtfully integrated and serve a diverse group of people working, living, and visiting downtown.

We have requested proposals from professional firms to perform a needs analysis and master planning for a new Transit Center Joint Development project. This needs analysis and master plan will be the basis used to obtain federal funding for a new multi-modal Transit Center and commercial/residential mixed-use development facility.

RFP PROCESS:

The request for proposal was distributed via Vendornet and published on the City of Appleton's website to potential consulting firms. Representatives from six firms attended a pre-proposal meeting where the project was defined along with the project scope. Only two firms who attended the pre-proposal meeting submitted proposals. The proposals were reviewed and scored by PRFMD, Community Development, and Valley Transit staff. The following table identifies the engineering firms along with their proposal score:

F '	TOTAL
Firm:	PTS
LHB	1110
Bowen	990

Table 1: Engineering Firms and RFQ Results

The evaluation team completed their review and scoring of the submitted proposals based on the Brooks Act. The Brooks Act is a federal requirement that professional services be awarded to be best qualified firm. The evaluation team then conducted interviews for both LHB and Bowen. The evaluation team found that LHB was the most qualified firm. After LHB was chosen based on qualifications, the evaluation team negotiated a fair contract price for the project.

The evaluation team then completed a reference check to ensure LHB was the right choice for Valley Transit, Community Development, and PRFMD for both quality of work and cost. The reference check demonstrated that LHB is a responsible firm that will provide a quality product at a fair price.

RECOMMENDATION

Award the Design Contract for the "2022 Transit Center Needs Assessment and Master Plan" to LHB Corporation in the amount of \$163,043.75 plus a 10% contingency of \$16,305 for a total not to exceed a project design cost of \$179,348.75.

Please contact me at 832-5572 or at <u>dean.gazza@appleton.org</u> with any questions.

B. Calculation Guidelines - Street Construction and Reconstruction

- 1. Assessments will be levied according to the front foot dimensions of abutting property except as noted.
- 2. The assessment rate will be the portion (%) of assessable construction costs in accordance with the charts above. Assessments will be reduced proportionately for pavements constructed less than the maximum widths.
- 3. Public owned property, including lands under the jurisdiction of the Board of Education, Parks and Recreation Committee and other branches of city, churches and private schools and other exempt properties will be assessed 100% of the "all other zoning" assessment rate regardless of the zoning. (BPW 2/2/94) All county, state and federal governments will be exempt from assessment charges. (City Attorney 1/23/14)

- 4. The assessment rate for alley pavement will be based on the full width of the pavement.
- 5. The City assumes the entire cost of permanent pavement for all intersections on new construction in areas platted prior to 1/1/04 or after 12/31/14.
- 6. Driveway approaches shall be constructed at property owner's expense when:
 - a. When permanent street surfaces are constructed.
 - b. Where a street has been permanently improved, driveway approaches shall be installed within six months of the completion of the adjacent structure.
 - c. When ordered **to be** installed by the Common Council.
 - d. When a property owner requests approach to be widened, rebuilt or closed.
- 7. The costs of closing unused driveway openings that are closed in conjunction with the paving program are not directly assessed to the property owner.

Any driveway approach without improved surface shall be paved with a permanent surface in conjunction with a street-paving project. The cost will be assessed to the property. (S&S 3/3/93 and MSC 9/3/97)

- 8. The cost of the initial asphalt surface application on a new subdivision gravel street will be billed at the time of official street opening.
- 9. All asphalt maintenance exclusive of the initial application will be done as general maintenance and at no cost to the abutting property.
- 10. Assessments for asphalt pavements that are constructed without curb and gutter (City standard) will be calculated by dividing total project cost by assessable frontage.
- 11. Assessments for trees will be included with paving assessments.
- 12. If one person owns an entire block as one parcel and the block is zoned R-1 or R-2, the shortest side shall be assessed in full. The remaining sides shall receive up to a 120' discount.
- 13. On paving projects where there are other contributing sources of funding such as federal, state, or from other units of government, the City rates will be applied. If projected revenue (using the City rates) exceeds the City's share of project costs, then assessment rates will be reduced proportionately so that revenue equals City share of project cost. "City share" of project cost will include, in addition to normal construction costs, items such as right-of-way acquisition, relocation costs, consultant cost, all Department of Transportation administrative and review costs, and any other fees charged by the other participating units of government. (BPW 1/7/97)
- 14. When the long side of a corner lot falls on the "bulb" or "mouse ear", the assessment shall be calculated as follows:
 - a. Determine a rate per foot by dividing the lump sum per lot charge by the actual footage of the long side.
 - b. The first 120 feet will be charged 25% of the rate calculated in "a" above. The balance of the frontage will be assessed at 100% of the rate calculated in "a" above. (BPW 1/21/98)

- 15. The requesting property owner, where permitted, shall pay all additional cost for indented parking.
- 16. When additional pavement width is required to accommodate on street bike lanes, the extra width beyond what would be required for a standard street design, will not be assessed.
- 17. Assessments will only be levied on partial or total street reconstruction for those streets that do not meet current City Street or Drainage standards prior to their reconstruction.
- 18. Calculation Guidelines:
 - a. On multiple frontage lots zoned R-1 or R-2, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet of each side will be assessed at 25% (R-2, 50%) of the assessment rate. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. On lots having multiple frontages, there will be NO assessment for the frontage to which access is legally precluded or fronts on a naturally occurring access barrier such as a steep incline.
 - c. On inside corner or multiple frontage lots, the side or sides precluded from access are not included in the assessment frontage determination.
 - d. On multiple frontage lots where all sides have equal frontage, the side to be considered the short side is the "Addressed" side.
 - e. On cul-de-sac lots, the abutting property owner shall be responsible for cul-de-sac pavement, overbuild costs including the straightaway portion of the affected property. The assessment will be calculated using total assessable cost divided by the number of properties fully or partially abutting the "bulb" according to the number of originally platted lots.
 - f. On "mouse ear" lots, defined as abutting lots to a widening in the road around a curve but not including lots on a cul-de-sac, the front foot dimensions for assessment calculation will be determined by dividing the square footage of the property by the average depth of the lots in the block.
 - g. For work abutting only part of a parcel's total frontage, assessments will be calculated based on the partial frontage. The balance will be assessed as work is completed along the remaining frontage.
 - h. Definition of "addressed" side: The street with the house number.
 - i. No corner lot exception will be provided for combined properties that did not meet the corner lot criteria prior to their combination.
- 19. The Wheel Tax is used **only** for **sidewalk replacement**, reconstructed asphalt and concrete streets. only. Not for rural to urban conversion to concrete pavement.
- 20. Portions of projects funded by TIF and IPLF are not assessable.

* See Calculation Guidelines

** Residential Use Properties to be Assessed as R-2

B. Calculation Guidelines - Sidewalks

- 1. Assessments will be levied according to the front foot dimensions of abutting property, except as noted.
- 2. Sidewalks on right-of-ways 60 feet or more will be a minimum of 5 feet wide. Sidewalks on right-of ways less than 60 feet will be a minimum of 4 feet.
- 3. There will be no assessment for sidewalk that meets the replacement criteria as defined in the Sidewalk Maintenance Policy.
- 4. Assessments will be levied when sidewalks not meeting replacement criteria are replaced at the property owner's request.

- 5. Service walks between the curb and sidewalk will be assessed to the property owner when installed on new subdivision streets.
- 6. The extra expense of installing a sidewalk beyond the City's standard width or in an unusual manner at the request of the owner will be charged to the abutting property owner.
- 7. Public owned property, including lands under the jurisdiction of the Board of Education, Parks and Recreation Committee and other branches of city, state or county governments, churches and private schools and other exempt properties will be assessed 100% of the assessment rate regardless of the zoning.
- 8. To figure credit for useful life (20 years) of sidewalk: credit = divide age of sidewalk by 20. If less than 1.0, multiply that number by the current assessment rate.
- 9. For City contract installation, sidewalk assessments shall include a 6% administration fee.
- 10. Calculation Guidelines:
 - a. On multiple frontage lots zoned R-1 or R-2, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet of each side will be assessed at 25% (R-2, 50%) of the assessment rate. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. On inside corner lots where all sides have equal footage, the side to be considered the short side is the "Addressed" side.
 - c. On lots having multiple frontages, there will be NO assessment for the frontage to which access is legally precluded or fronts on a naturally occurring access barrier such as a steep incline.
 - d. On inside corner or multiple frontage lots, the side or sides precluded from access is not included in the assessment frontage determination.
 - e. For work abutting only part of a parcel's total frontage, assessments will be calculated based on the partial frontage. The balance will be assessed as work is completed along the remaining frontage.
 - f. Definition of "addressed" side: The street with the house number.

* See Calculation Guidelines ** Residential Use Properties to be Assessed as R-2

B. <u>Calculation Guidelines – Sanitary Sewer</u>

- 1. Assessments will be levied according to the front foot dimensions of abutting property, except as noted. The assessment rate for new sanitary sewers will be determined on the basis of actual construction cost up to and including 12" sanitary sewer main and maintenance holes. The assessment rate for new construction in an existing area will be based upon the rates shown in the chart above.
- 2. Area assessment, where applicable, will be levied in accordance with Section 18-116 of the Municipal Code of the City of Appleton.

- 3. Any lot or parcel within the corporate limits which has not paid a sanitary sewer assessment when the main was installed will, at the time the lateral permit is taken out, be required to pay a connection fee with the lateral permit fee. Payment of a connection fee must be made in full prior to connecting. The connection fee, equivalent to the front foot assessment and area assessment, will be based on the assessment rates the year the main was installed.
- 4. When utilities are installed in a street where one side is within the corporate limits but remains undeveloped, assessments will be levied for the utilities that benefit the parcel. The area assessment for sanitary sewer is calculated using a nominal lot depth of 120 feet. The balance of the area assessment will be assessed when the property is developed and charged a connection fee in lieu of assessments.
- 5. On sanitary relay, where existing laterals meet the sanitary lateral policy and are not relaid, the cost of reconnecting (including short sections of connecting pipe, usually within the trench area) is absorbed by the City and not assessed to the property owner.
- 6. <u>Calculation Guidelines (see chart for applicability):</u>
 - a. On multiple frontage lots zoned R-1 or R-2, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet for each side will be assessed at 0% of the assessment. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. On multiple frontage lots where all sides have equal frontage, the side to be considered the short side is the "Addressed" side.
 - c. Where sewer exists across an entire parcel frontage, but sewer construction only occurs along part of a parcel's total frontage, assessments will be calculated based on the partial frontage. The balance will be assessed as work is completed along the remaining frontage. Where sewer exists along only a portion of the parcel frontage, the entire frontage will be assessed.
 - d. Assessment for construction of sanitary sewer will be levied against all abutting property frontage regardless if laterals are present, provided that the property is not legally precluded from connecting to the sewer. Amount of assessment will be calculated according to existing policy.
 - e. Cost of sewer and maintenance hole construction deeper than 16 feet shall be borne by the city except where extra depth is required for development of adjacent property.
 - f. No corner lot exception will be provided for combined properties that did not meet the corner lot criteria prior to their combination.
 - g. For cul-de-sac lots, the assessable footage for each lot shall be the sum of frontages for all lots fully or partially abutting a cul-de-sac divided by the number of lots.
 - h. Assessable footage for sewers constructed within easements shall be equal to the centerline length of easement falling within the property. Assessments will be levied to only those properties with lateral connections to the easement sewer. The easement length will be considered as "frontage" for purposes of calculating multiple-frontage reductions (see 6a. above).
 - i. Sanitary main reconstruction will be borne by the Wastewater Utility.

IV. SANITARY SEWER LATERALS

A. General Definition

- 1. For new development funded by the City, the total cost of lateral installation will be assessed to the property.
- 2. The assessment rate for reconstruction of laterals and construction of new laterals in existing streets will be based upon the rates shown in the chart from Section III above.

B. Calculation Guidelines

- 1. Assessments for laterals will be based on the unit cost per foot as indicated in the chart in section III.A applied to the length of the lateral between the sanitary sewer and the property line. The length of lateral assessed shall not exceed ¹/₂ the street right-of-way width.
- 2. Assessments for laterals within cul-de-sacs will be based on the actual length of lateral installed, but shall not exceed the right-of-way radius for the cul-de-sac bulb.
- 3. Assessments for laterals connected to sewers within easements will be based on actual length of lateral installed, but not to exceed ¹/₂ the right-of-way width of the street for which the property is addressed.
- 4. <u>Total Lateral Replacement Program Calculation Guidelines:</u>
 - a. For properties electing to participate: No assessments will be levied for the portion of private lateral replaced within the public right-of-way. Property owners will be assessed 50% of the actual cost for lateral replacement on private property.
 - b. For properties declining to participate: City will only replace the portion of lateral within the public right-of-way. Property owners will be assessed 100% of the actual cost.

** Residential Use Properties to be Assessed as R-2

⁺ See Section V.B.3.b. for exceptions

B. <u>Calculation Guidelines – Stormwater Facilities</u>

- 1. Stormwater facilities shall be installed as needed to serve properties contributing to the need for, and benefiting from, such facilities. Storm main shall be installed to serve all properties on arterial streets prior to total reconstruction of the pavement.
- 2. Assessable stormwater facilities under this section include storm sewer, mains and piping, maintenance holes, inlets and inlet leads. Assessments shall also include overhead, property acquisition and financing costs attributable to the facilities.
- 3. Assessments for storm sewer will be levied according to the front foot dimensions of abutting property.
 - a. R-1, R-2, zoning The cost of (re) constructing or relining in existing streets will be borne by the Stormwater Utility.
 - b. The cost of constructing or reconstructing storm sewers, mini-sewers or other drainage facilities in existing developed areas zoned R-1 and R-2 annexed after January 1, 1999 will be fully assessable to the abutting property owners.
 - c. All Other Zoning

The assessment rate for storm sewer (re) construction or relining in existing streets will be 33% of the actual construction cost, up to and including 15" storm main (not deeper than 10'), maintenance holes, inlets and inlet leads. Credit will be given for the remaining useful life of a reconstructed or relined sewer based on current cost of construction. For this purpose, the useful life of storm sewer will be 75 years.

- 4. Assessments for new developments will be based on the actual construction costs of facilities required by the subdivision and charged on a per lot basis. To calculate an equivalent lot cost for parkland, school properties or other atypical lots, use the average size of a new development lot that abuts the parkland, school property or atypical lot. Example, if a lot is 10,000 square feet and parkland, school property or atypical lot is 100,000 square feet; the charge for that land would be equivalent to 10 lots.
- 5. Any lot or parcel zoned other than R-1 or R-2, within the corporate limits which has not paid a storm sewer assessment when the main was installed will, at the time the lateral permit is taken out, be required to pay a connection fee with the lateral permit fee. This will be effective the same date as the initial Special Assessment policy for storm sewers. The connection fee, equivalent to the front foot and area assessment, will be based on the assessment rates the year the main was installed.
- 6. Public owned property, including lands under the jurisdiction of the Board of Education, Parks and Recreation Committee and other branches of city, state or county governments, churches and private schools and other exempt properties will be assessed 100% of the assessment rate regardless of the zoning.
- 7. <u>Calculation Guidelines</u> (See chart for applicability):
 - a. On multiple frontage lots zoned R-1 or R-2, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet of each side will be assessed at 0% of the assessment rate. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. On multiple frontage lots where all sides have equal frontage, the side to be considered the short side is the "Addressed" side.

- c. At the completion of the improvements, where sewer exists across an entire parcel frontage, but sewer construction only occurs along part of a parcel's total frontage, assessments will be calculated based on the partial frontage. The balance will be assessed as work is completed along the remaining frontage. Where sewer exists along only a portion of the parcel frontage, the entire frontage will be assessed.
- d. Assessment for reconstruction or relining of storm sewer will be levied only when the work affects the main to which the property is connected. Amount of assessment will be calculated according to the existing policy.
- e. No corner lot exception will be provided for combined properties that did not meet the corner lot criteria prior to the combination.
- f. New Development 100% of actual construction costs of facilities required by the development plus area assessment.
- g. For cul-de-sac lots, the assessable footage for each lot shall be the sum of frontages for all lots fully or partially abutting a cul-de-sac divided by the number of lots.
- h. Assessable footage for sewers (re)constructed within Easements shall be equal to the centerline length of easement falling within the property. Assessments will be levied to only those properties with lateral connections to the easement sewer. The easement length will be considered as "frontage" for purposes of calculating multiple-frontage reductions (see 7a. above).
- i. Rural to urban conversion shall be assessed as new.

VI. STORM SEWER LATERALS

A. General Information

- 1. For new development funded by the City, the total cost of lateral installation will be assessed to the property.
- 2. The assessment rate for reconstruction of laterals and construction of new laterals in existing developed streets will be 50% of the actual construction cost.
- 3. Street Reconstruction:
 - a. Arterial Streets Prior to total reconstruction of a street, at locations where existing storm sewers are being replaced or new storm sewers are being installed, storm laterals shall be installed to all properties that are not yet served.
 - b. Non-arterial Streets Prior to total reconstruction of a street, storm laterals shall be installed to all properties not zoned R-1 or R-2. In addition, laterals shall be installed to residential properties based on needs identified under the mini-sewer and rehabilitation programs.

B. <u>Calculation Guidelines</u>

- 1. Assessments for laterals will be based on the unit cost per foot as indicated in the chart in section V.A applied to the length of the lateral between the storm sewer and the property line. The length of lateral assessed shall not exceed ½ the street right-of-way width.
- 2. Assessments for laterals within cul-de-sacs will be based on the actual length of lateral installed, but shall not exceed the right-of-way radius for the cul-de-sac bulb.
- 3. The cost of installing new laterals to properties zoned R-1 or R-2 will be borne by the Stormwater Utility unless the property was annexed after January 1, 1999.
- 4. Assessments for laterals connected to sewers within easements will be based on actual length of lateral installed, but not to exceed ¹/₂ the right-of-way width of the street for which the property is addressed.

B. Calculation Guidelines – Water Mains and Services

- 1. Assessments will be levied according to the front foot dimensions of abutting property, except as noted. The assessment rate will be determined on the basis of actual construction cost required by the city for development:
 - a. R-1, R-2 and R-3 zoning. All costs to construct water main up to and including 8" main, hydrants and valves.

- b. C-1 and C-2 zoning. All costs to construct water main up to and including 12" main, hydrants and valves.
- c. Other zoning. All costs to construct water main up to and including 16" main, hydrants and valves.
- d. Water main installed for transmission use shall not be assessed, except if no other main is available for service. The property shall be assessed at the rate of the year the main was installed based on zoning at the time of connection.
- e. All costs to furnish and install hydrants, including leads and valves shall be assessed.
- f. In-kind water main reconstruction, including hydrants and leads, is not assessed.
- g. All additional costs to upgrade a water main, including additional valving due to a service and/or fire line, when requested, shall be borne by the property owner.
- h. New, and/or additional water main(s) installed for circulation and/or looping in a developed area shall not be assessed, except in case of B1.d.
- 2. Permission to connect to the City water main prior to annexation must be obtained from the Common Council through the Utilities Committee.
- 3. Any lot or parcel within the corporate limits which has not paid a water main assessment when the main was installed will, at the time the water lateral permit is taken out, be required to pay the connection fee with the lateral permit fee. Payment of a connection fee must be made in full prior to connecting. The connection fee, equivalent to the front foot water main assessment, will be based on the assessment rate the year the main was installed. Payment for connection fees may be made in accordance with Section XI.
- 4. New Service Installation. The property owner or developer per Schedule Cz-1 (attached) shall pay all installation costs from the main through and including the curb shut-off.
- 5. Replacement of Service. All additional cost to upgrade a service (example, 1" copper to 4" service line) shall be borne by the property owner or developer.
- 6. Public owned property, including lands under the jurisdiction of the Board of Education, Parks and Recreation Committee and other branches of city & county governments, churches and private schools and other exempt properties will be assessed 100% of the C-1, C-2 assessment rate regardless of the zoning.
- 7. <u>Calculation Guidelines (see chart for applicability):</u>
 - a. On multiple frontage lots zoned R-1, R-2 or R-3, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet of each side will be assessed at 0% of the assessment rate. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. No corner lot exception will be provided for combined properties that did not meet the corner lot criteria prior to their combination.
 - c. Where water main exists across an entire parcel frontage, but construction only occurs along part of a parcel's total frontage, assessments will be calculated based on the partial frontage. The balance will be assessed as work is completed along the remaining frontage. Where water main exists along only a portion of the parcel frontage, the entire frontage will be assessed.
 - d. On multiple frontage lots where all sides have equal frontage, the side to be considered the short side is the "Addressed" side.
 - e. For cul-de-sac lots, the assessable footage for each lot shall be the sum of frontages for all lots fully or partially abutting a cul-de-sac divided by the number of lots.

- f. Assessable footage for water mains (re)constructed within Easements shall be equal to the centerline length of easement falling within the property. Assessments will be levied to only those properties with service connections to the easement main. The easement length will be considered as "frontage" for purposes of calculating multiple-frontage reductions (see 7a. above).
- g. Assessments for water services will be based on the unit cost per foot as indicated in the chart in section VII.A applied to the length of the service between the main and the property line. The length of water service assessed shall not exceed ½ the street right-of-way width.
- h. Assessments for water services within cul-de-sacs will be based on the actual length of service installed, but shall not exceed the right-of-way radius for the cul-de-sac bulb.
- i. Assessments for laterals connected to watermain within easements will be based on actual length of lateral installed, but not to exceed ½ the right-of-way width of the street for which the property is addressed.

VIII. STREET LIGHTING

A. Calculation Guidelines

- 1. Assessments for non-decorative streetlights will be levied according to the front foot dimensions of abutting property except as noted.
- 2. Assessments will be levied at the time of and in conjunction with the initial street light installation.
- 3. The assessment rate will be based on the actual cost of installation.
- 4. The assessment rate for replacement of existing streetlights will be based upon the additional cost of enhanced features beyond standard street light requirements.
- B. Assessment Exceptions:
 - a. On multiple frontage lots zoned R-1, R-2 or R-3, the shortest side will be assessed at 100% of the assessment rate. On the other sides, the first 120 feet of each side will be assessed at 0% of the assessment rate. The balance of the frontage will be assessed at 100% of the assessment rate.
 - b. On inside corner or multiple frontage lots, the side or sides precluded from access is not included in the assessment frontage.

⁺ See Section IX.B.2 for exceptions

B. Calculation Guidelines - New subdivisions

1. The City does not provide funding for New Subdivisions platted between January 1, 2004 and December 31, 2014 except as indicated in the chart above. Escrow accounts or

irrevocable lines of credit will be required of developers for all items administered or installed by the City.

- 2. For subdivisions platted prior to 1/1/04 or after 12/31/14, assessments for concrete pavement shall be levied in accordance with Section I.A. of this policy.
- 3. Engineering fees for new subdivision developments shall be included in assessments. Included shall be preparation of plans and specifications, consultant fees, material testing fees, field survey, inspection and assessment preparation.
- 4. Individual lots within but not part of a new development when funded by the city shall be assessed at the current city interest rate.
- 5. Extraordinary sanitary sewer construction costs not to be assessed include pipes larger than 12" and depths greater than 16' when project funded by the city.
- Typical residential street lighting will consist of LED cut-off style fixture, mounted 30feet high on a wooden pole, spaced anywhere from 250 to 300 feet apart. Decorative lighting beyond these standards will have on-going annual special assessments per development agreements.
- 7. The effective date for interest to begin accumulating on new subdivision developments will be the date of invoice. This includes all city utilities and street work.
- 8. Storm sewer area assessment for regional facilities built prior to 3-1-2006 shall be based on the cost of storm sewer needed to serve the subdivision and the share of downstream trunk main.

X. SPECIAL CHARGES

A. General definition

1. Special charges shall accrue interest starting 30 days following the invoice date. Interest shall accrue at the same rate as for special assessments. (Board of Public Works, June 6, 1990).

XI. METHOD OF PAYMENT

A. General Definition

- 1. Lump sum payment to be paid at due date.
- 2. One installment if the assessment is \$1000 or less.
- 3. Five equal annual installments if the assessment is greater than \$1000.
- 4. Deferred payments will bear an interest at the rate of prime plus 3.00% per annum on the unpaid balance.
- 5. Separate current year special assessment bills may be combined to establish eligibility for the \$1000 limit for installment payment options. Finance Department must be notified prior to November 1.

XII. APPEAL PROCESS

1. If the governing body decides to reconsider and reopen any assessment, the body may, after giving a public notice as required for the initial assessment, and after a public hearing, amend, cancel or confirm the prior assessment. Any request for a change to the first assessment, must be made within 30 days of the passage of the original final resolution. The Clerk shall publish a notice of any resolution changing the assessment, as was done with the original assessment.

XIII. MISCELLANEOUS

- 1. Deferred payment of special assessments is not permitted. (See WI Statutes Chapter 74.)
- Any construction project where right-of-way acquisition would contribute to 25% or more of the assessment rate shall be brought to the Board of Public Works Finance Committee for review and establishment of an appropriate assessment rate. In establishing this rate, the Board will consider assessment rates for similar projects and any other information it considers relevant.

XIV. REFERENCED ITEMS

1/17/83 Street and Sanitation Committee #3

The following policy concerning sump pump discharges adopted, "When streets are paved where storm sewer laterals exist, curb openings for sump pump discharges or surface drainage shall not be allowed."

7/06/83 Street and Sanitation Committee #6 Most of this information has been put in Appendix IX Stormwater/Clear Water Discharges

3/03/93 Street and Sanitation Committee #10

Any driveway adjacent to a street paving project that is not used will be closed with curb and gutter and will have the terrace reseeded in conjunction with the street paving. The cost of this work is to be included with the assessment for curb and gutter on the project.

Any driveway aprons without improved surfaces shall be either paved with permanent surface or abandoned and closed in conjunction with a street paving project. The cost of either option will be assessed to the property.

- 2/02/94 Board of Public Works Report This was adopted as part of the assessment policy."Publicly owned property, including lands under the jurisdiction of the Board of Education, Park Board, Water Department and other branches of city, state or county governments, and churches and private schools be assessed 100% of the assessment rate.
- 11/16/94 Municipal Services Committee #2 "Resolved, that when a property asks for a second curb cut, the two neighboring properties to each side of the requesting property be notified and asked if they have any problems with the curb cut. If any of the four (4) properties are against the second curb cut, the request must be brought to Municipal Services Committee and Council for approval, thus all neighbors have an avenue for input."
 - 1/18/95 Board of Public Works #3 The Board reaffirms its previous recommendation that: The special assessment policy for stormwater that recovers 75% of costs from new

developers and 40% from existing benefiting owners be approved. Existing is defined as that a building permit has been issued at the time of adoption of the policy by the Common Council.

- 1/17/96 Board of Public Works This was adopted with the assessment policy.Sidewalks B.2 The assessment rate for reconstruction of sidewalks will be 125% of the rate of new sidewalks.
- 9/03/97 Municipal Services Committee Amended Driveway Opening Policy "Any driveway adjacent to a street reconstruction project that is not used will be <u>permanently paved</u> or closed with curb and gutter and will have terrace reseeded in conjunction with the street work.
- 3/03/99 Board of Public Works "Resolved, that the repair and replacement of existing sidewalks in the green dot program be paid by the general fund after green dot has gone through the City once. All hazardous sidewalks as defined by City criteria will be replaced at City cost."
- 5/15/13 Board of Public Works Prime plus 3% will be the rate set for the 5-year payment option.

Cost for 2005 basins \$1,104.00 Plank Road Northwest Pond

Sheet No.1 of 1Schedule No.Cz-1Amendment No.64

RATE FILE Public Service Commission of Wisconsin Appleton Water Department

WATER LATERAL INSTALLATION CHARGE

Subdivision developers shall be responsible, where the main extension has been approved by the utility, for the water service lateral installation costs from the main through the curb stop and box.

When the cost of a utility main extension is to be collected through assessment by the municipality, the actual average water lateral installation costs from the main through the curb stop and box shall be included in the assessment of the appropriate properties.

The initial water service lateral(s), not installed as part of a subdivision development or an assessable utility extension, will be installed from the main through the curb stop and box by the utility, for which the actual cost will be charged.

Billing: Same as Schedule Mg-1.

CITY OF APPLETON Department of Public Works MEMORANDUM

TO: Finance Committee
Municipal Services Committee
Utilities Committee

SUBJECT: Award of Contract

The Department of Public Works recommends that the following described work:

Unit H-21 Redundant Raw Water Line

Be awarded to:

 Name:
 PTS Contractors Inc

 Address:
 4075 Eaton Road

 Green Bay, WI 54311

In the amount of :			\$4,875,000.00
With a	10.3%	contingency of :	\$500,000.00
For a pro	oject total	not to exceed :	\$5,375,000.00

** OR **

In an amount Not To Exceed :

Budget:	\$8,280,000.00
Estimate:	\$6,500,000.00
Committee Date:	05/23/22
Council Date:	06/01/22

Bid Tabulation H-21 Redundant Raw Water Line 05/16/2022 01:45 PM CDT

MEMORANDUM

"...meeting community needs...enhancing quality of life."

TO:	Community and Economic Development Committee
FROM:	Nikki Gerhard, Community Development Specialist
DATE:	May 25, 2022
RE:	Final Award Recommendations for 2022 Community Development Block Grant Funding

The City of Appleton CDBG HUD award was recently announced, with the City of Appleton allocated \$565,880 for the 2022 program year. This is 4.5% lower than the 2021 allocation, and \$33,830 lower than the anticipated allocation (\$599,710).

The 2022 preliminary awards were approved in November 2021, totaling the \$599,710 (City programs and sub recipients combined).

Staff recommends the following reduction of \$33,830 as follows:

Reduce the Appleton Housing Authority's Award by \$33,830 for Final Award of \$41,170.

Due to staffing turnover and an extremely difficult housing market, the Appleton Housing Authority (AHA) has been unable to spend down any portion of the 2021 allocation, to date. In addition, in February 2022, AHA requested the reallocation of their remaining 2020 award - \$42,824.66 - to Rebuilding Together Fox Valley, due to the limitations mentioned previously.

The reduction of this allocation will allow the total outstanding funds to be utilized in a timely manner by the end of the 2022 program year (March 31, 2023), while still providing ample funding between the two program years (\$116,170 in total available).

The following attachments are provided for additional information for this action item.

Attached Documents:

- 1.) CEDC Memo Requesting Reallocation of AHA 2020PY Award
- 2.) Executive Summary of Award Recommendations for 2022 CDBG Program Year
- 3.) Simple Summary of Award Recommendations for 2022 CDBG Program Year

If you have any questions, please contact me at 832-6469 or nikki.gerhard@appleton.org. Thank you!

MEMORANDUM

"...meeting community needs...enhancing quality of life."

TO:	Community and Economic Development Committee
FROM:	Nikki Gerhard, Community Development Specialist
DATE:	February 9, 2022
RE:	Amendment to Appleton Housing Authority 2020 Allocation

On January 4, 2022, City staff received notification from the Appleton Housing Authority (AHA) seeking to reallocate their remaining balance of \$42,824.66 from the 2020 program year to another agency and eligible activity. This remaining balance was unspent funding originally allocated for the purposes of AHA's First Time Homebuyer Program.

Due to a significant amount of loan payoffs, as well as a vacancy in their Homebuyer Program Manager role for an extensive period, the AHA had originally requested program year extensions, expiring December 31, 2021, in an effort to spend the funds down.

Staff recommends reallocating the balance of \$42,824.66 to Rebuilding Together Fox Valley (RTFV). RTFV's homeowner rehabilitation program is a similar housing activity to AHA's, which has been consistently funded since 2017. Staff of RTFV has expressed interest in these funds, as they have already spent down their 2020 and 2021 allocations (\$200,000 total) and have additional housing projects that could be expedited with this reallocation.

Staff Recommendation:

The reallocation of Appleton Housing Authority's 2020PY \$42,824.66 to Rebuilding Together Fox Valley's 2021PY SubAgreement for homeowner rehabilitation **BE APPROVED**.

The following attachments are provided for additional information for this action item.

Attached Documents:

- 1.) Email from Appleton Housing Authority staff requesting reallocation of unspent balance from 2020PY.
- 2.) Draft amendment to RTFV's 2021PY SubAgreement, increasing their allocation to a total of \$142,824.66.

If you have any questions, please contact me at 832-6469 or nikki.gerhard@appleton.org. Thank you!

MEMORANDUM

"...meeting community needs...enhancing quality of life."

TO:	Human Resources/Information Technology Committee and Appleton Common Council
FROM:	Karen Harkness, Community & Economic Development Director
DATE:	May 20, 2022
RE:	Request approval of over-hire for City Assessor position

The City of Appleton City Assessor has provided notice of retirement effective the middle of August 2022.

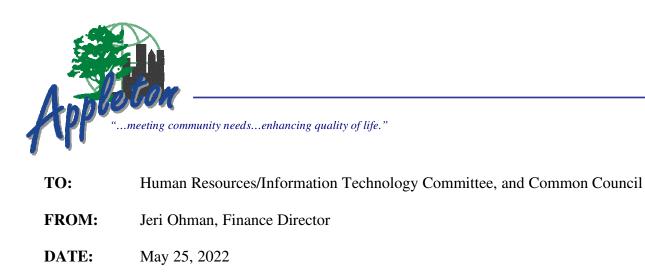

This position is critical to the organization and works independently on many processes related to assessment and keeping property values current. Other priorities include Tax Increment Financing District data and reporting, project evaluation for new and redevelopment projects, and many other task and responsibilities including supervision of a professional assessment staff of five.

The incumbent has 18 years of experience in this position and holds a wealth of knowledge. For a successful transition to the position's successor, I believe the City of Appleton would benefit from having the incumbent provide valuable training over a three-week period with an over-hire.

The hiring process is currently open, and we hope to have someone hired by early June 2022.

The cost for this over-hire is expected to be approximately \$7,500. This additional cost can be absorbed within the current 2022 Community & Economic Development Department budget.

Thank you for your consideration of this request. If you should have any questions or would like to discuss this further, feel free to contact me at 920-832-6408 or email karen.harkness@appleton.org.

RE: Request Approval of Over Hire for Payroll Coordinator

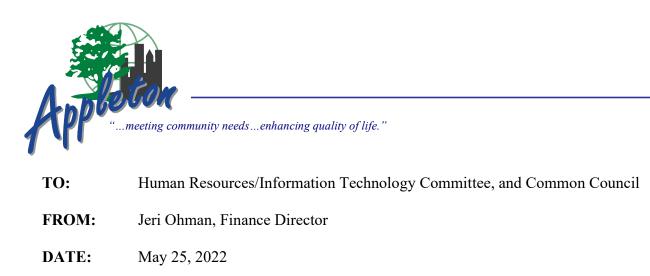

The City of Appleton Payroll Coordinator has provided notice of retirement effective September 2, 2022. This position has been performed by the incumbent for over 20 years.

This position is critical to the organization and works independently on bi-weekly payroll processing, payments related to payroll withholdings, and monthly/quarterly/annual reporting requirements. It is responsible for knowing and applying federal and state regulations pertaining to payroll. This position is also responsible for maintaining the payroll module of Tyler Munis.

In order for us to have a successful transition, I believe the City would benefit from having the incumbent provide training over a six week period. This would allow for three pay periods and one monthly reporting period during the over hire timeframe.

The hiring process has started and our hope is to have a successor start on July 25, 2022. The financial impact is expected to be approximately \$9,000. This cost can be absorbed within the current 2022 Finance Department budget.

Thank you for your consideration of this request. Please feel free to contact me if you have questions.

RE: Request Approval of Over Hire for Purchasing Manager

The City of Appleton Purchasing Manager has provided notice of retirement effective August 5, 2022. This position has been performed by the incumbent for 20 years.

This position is responsible for managing centralized purchasing and the procurement card program for the City, including monitoring compliance with established policies and procedures. This position also assists departments with contract and procurement-related questions.

In order for us to have a successful transition, I believe the City would benefit from having the incumbent provide training over a three week period. This would allow time to train on the different aspects of the position, as well as transfer knowledge of current issues.

The hiring process has started and our hope is to have a successor start on July 18, 2022. The financial impact is expected to be approximately \$5,000. This cost can be absorbed within the current 2022 Finance Department budget.

Thank you for your consideration of this request. Please feel free to contact me if you have questions.

PARKS, RECREATION & FACILITIES MANAGEMENT Dean R. Gazza, Director 1819 East Witzke Boulevard

Appleton, Wisconsin 54911-8401 (920) 832-5572 FAX (920) 993-3103 Email - <u>dean.gazza@appleton.org</u>

- TO: Fox Cities Transit Commission
- FROM: Dean R. Gazza, Director, Parks, Recreation and Facilities Management
- DATE: 5/24/2022
- RE: Action Item: Award the Design Contract for the "2022 Transit Center Needs Assessment and Master Plan" to LHB Corporation in the amount of \$163,043.75 plus a 10% contingency of \$16,305 for a total not to exceed a project design cost of \$179,348.75.

PROJECT

The 2022 Valley Transit budget has allocated monies to perform a needs assessment and create a master plan for the Transit Center facility all in accordance with all Federal Transit Administration Guidelines. This Master Plan will be the basis used to obtain federal funding for a future Joint Development Transit Center Project. This memo addresses selecting a consultant to perform a needs assessment and create a Master Plan for the Transit Center Joint Development Facility Project.

BACKGROUND

Located at 100 E. Washington Street, the existing site is appropriately located in downtown Appleton and consists of approximately one acre. Existing improvements include bus parking and the Transit Center facility. The Transit Center facility was constructed in 1989 and is approximately 5,700 square feet. This project will incorporate a new Transit Center with improved services and safety, and a public and private development featuring a mix of commercial and residential uses, public open spaces which are thoughtfully integrated and serve a diverse group of people working, living, and visiting downtown.

We have requested proposals from professional firms to perform a needs analysis and master planning for a new Transit Center Joint Development project. This needs analysis and master plan will be the basis used to obtain federal funding for a new multi-modal Transit Center and commercial/residential mixeduse development facility.

RFP PROCESS:

The request for proposal was distributed via Vendornet and published on the City of Appleton's website to potential consulting firms. Representatives from six firms attended a pre-proposal meeting where the project was defined along with the project scope. Only two firms who attended the pre-proposal meeting submitted proposals. The proposals were reviewed and scored by PRFMD, Community Development, and Valley Transit staff. The following table identifies the engineering firms along with their proposal score:

	TOTAL
Firm:	PTS
LHB	1110
Bowen	990

Table 1: Engineering Firms and RFQ Results

The evaluation team completed their review and scoring of the submitted proposals based on the Brooks Act. The Brooks Act is a federal requirement that professional services be awarded to be best qualified firm. The evaluation team then conducted interviews for both LHB and Bowen. The evaluation team found that LHB was the most qualified firm. After LHB was chosen based on qualifications, the evaluation team reviewed the cost proposal and found it to be reasonable based on earlier project estimates and prior awards for similar services.

The evaluation team then completed a reference check to ensure LHB was the right choice for Valley Transit, Community Development, and PRFMD for both quality of work and cost. The reference check demonstrated that LHB is a responsible firm that will provide a quality product at a fair price.

RECOMMENDATION

Award the Design Contract for the "2022 Transit Center Needs Assessment and Master Plan" to LHB Corporation in the amount of \$163,043.75 plus a 10% contingency of \$16,305 for a total not to exceed a project design cost of \$179,348.75.

Please contact me at 832-5572 or at dean.gazza@appleton.org with any questions.

TITLE VI PROGRAM

2022-2025

Title VI Program

Valley Transit – Appleton, WI

Adopted on:

Adopted by: Fox Cities Transit Commission

*FCTC minutes attached

This policy is hereby adopted and signed by:

Valley Transit

Executive Name/Title:	Ron McDonald, General Manager
Executive Signature:	

Policy Statement

Valley Transit as a recipient of Federal Transit Administration (FTA) grant dollars either directly from FTA or through the Wisconsin Department of Transportation (WisDOT) will comply with the Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d) and the U.S. Department of Transportation implementing regulations.

Title VI Plan Elements

Valley Transit's Title VI plan includes the following elements:

- 1. Evidence of Policy Approval
- 2. Notice to the Public
- 3. Complaint Procedure
- 4. Complaint Form
- 5. List of transit related Title VI Investigations, Complaints and Lawsuits
- 6. Public Participation Plan
- 7. Language Assistance Plan
- 8. Minority Representation Table and Description
- 9. Facility Location Equity Analysis
- 10. Fixed Route Service Standards
- 11. Fixed Route Service Policies

<u>Note</u>: Additional materials will be attached, if required.

Policy Updates – Activity Log

Valley Transit will review its policy at least once a year to determine if modifications are necessary. Modifications are noted in the log below.

Date	Activity (Review/Update/Addendum/ Adoption/Distribution)	Person Responsible	Remarks

Evidence of Policy Approval

Fox Cities Transit Commission approval of this Title VI Program are found in applicable meeting minutes at the end of this document.

Title VI Notice to the Public

Valley Transit's Notice to the Public is included below:

Valley Transit's Title VI notice is posted in the following locations:

- ✓ Agency website <u>www.myvalleytransit.com</u>
- ✓ Public area of Administrative Office
- ✓ Inside vehicles
- ✓ Rider Guide and Schedule
- ✓ Downtown Transit Center

Title VI Complaint Procedure

Valley Transit's Title VI Complaint Procedure is made available in the following locations:

- ✓ Website
- ✓ Hard copy in Administrative Office and Downtown Appleton Transit Center

Any person who believes she or he has been discriminated against on the basis of race, color, or national origin by Valley Transit may file a Title VI complaint by completing and submitting the agency's Title VI Complaint Form.

Valley Transit investigates complaints received no more than 180 calendar days after the alleged incident. Valley Transit will process complaints that are complete.

Once the complaint is received, Valley Transit will review it to determine if our office has jurisdiction. The complainant will receive an acknowledgement letter informing her/him whether the complaint will be investigated by our office.

Valley Transit has five (5) calendar days to investigate the complaint. If more information is needed to resolve the case, Valley Transit may contact the complainant.

The complainant has ten (10) calendar days from the date of the letter to send requested information to the investigator assigned to the case.

If the investigator is not contacted by the complainant or does not receive the additional information within thirty (30) calendar days, Valley Transit can administratively close the case. A case can also be administratively closed if the complainant no longer wishes to pursue their case.

After the investigator reviews the complaint, she/he will issue one of two (2) letters to the complainant: a closure letter or a letter of finding (LOF).

- ✓ A <u>closure letter</u> summarizes the allegations and states that there was not a Title VI violation and that the case will be closed.
- ✓ A <u>letter of finding (LOF)</u> summarizes the allegations and the interviews regarding the alleged incident, and explains whether any disciplinary action, additional training of the staff member or other action will occur.

If the complainant wishes to appeal the decision, she/he has 180 calendar days after the date of the letter or the LOF to do so.

A person may also file a complaint directly with the Federal Transit Administration, at FTA Office of Civil Rights, 1200 New Jersey Avenue SE, Washington, DC 20590.

If information is needed in another language, then contact 920-832-5800.

Title VI Complaint Form

Valley Transit's Title VI Complaint Procedure is made available in the following locations:

Public Participation Plan

Process

An ongoing forum for public participation is offered during every Fox Cities Transit Commission (FCTC) public meeting. The FCTC is scheduled to meet two times each month and time is provided for public participation on agenda items at each meeting. FCTC meetings are held during the operating hours of Valley Transit services to improve access for the public. The meeting location is the City of Appleton City Hall, which is located one block south of Valley Transit's downtown transit center.

Proposed fare and service changes are announced to the public by the means described in this section, and public input is solicited far enough in advance for Valley Transit to consider the comments and make revisions based on the comments. Valley Transit's Public Participation Policy is posted on its website as a resource to help community members understand how to submit comments and when they are considered by the FCTC commissioners prior to finalizing decisions. Public meetings are noticed in the local newspaper and other forums for service and fare changes as described in Public Participation Policy. Individuals and organizations can request notification of future meetings. An archive of agendas and meeting minutes are posted via a link on Valley Transit's website.

Beyond monthly FCTC meetings, several other methods are used to communicate with riders. Valley Transit Route Map/Rider Guide is a printed map with guidance for using services and includes information on how to contact Valley Transit, as well as the web address and social media options. Each year, 30,000 route maps are printed and distributed throughout the community. Maps are available at several key destinations in the Fox Cities, on all transit vehicles and at the main office. Valley Transit also publishes brochures that describe specific programs and policies. These materials are available to riders at the main office (801 S Whitman Ave), downtown transit center, website (PDF), and are distributed to local agencies. These printed materials are mailed upon request at no cost.

Valley Transit's downtown transit center, located at 100 Washington Street, provides another communication avenue with riders. The transit center facility has a staffed customer service window. When no staff are available, a courtesy phone is available to speak with staff. The transit center has three digital monitors and other displays containing travel information, notices to the public, contact information, and other announcements or resources applicable to the service. The transit center is centrally located in the service area and many routes pulse into the center for transfers between routes.

Each Valley Transit bus contains an info display area, brochure holders and interior ad space along the entire interior. Maps, brochures, flyers and notices are placed on buses for display to riders.

Valley Transit's website (<u>www.myvalleytransit.com</u>), Twitter page and Facebook page also provide information to the public. The website content includes information on bus trip planning, demand response programs, fares, contact info, board meeting agendas and minutes, detours, news/blog and more. Public input is welcomed via the website and visitors are provided several options for contacting Valley Transit (fax, mail, email, web comment form or phone). The website is designed to be accessible, clear and easy to use. A website plug-in called accessiBe is used to provide state of the art features to enable a wider range of visitors with the tools and adjustments need to view the content. The website also utilizes Google Translate to provide language options beyond English.

Valley Transit maintains a rider app that provides real-time bus location, rider announcements and other information useful to riders or the general public.

Valley Transit's planning process (Transit Development Plan - TDP) contains its own Public Participation Plan. The PPP is developed and managed by our Metropolitan Planning Organization (MPO) and identifies outreach efforts and public involvement opportunities. Techniques used to gain input from minority and LEP populations include involving stakeholders in the steering committee. This also helps to disseminate information to populations that can be hard to reach. The MPO uses public notices in appropriate non-English languages and maintains contacts with local translators. TDP meetings are held at different locations that are accessible and reasonably welcoming to all residents. Our most recent TDP steering committee was made up of organizations and advocacy groups that represented a variety of community interests. The participant list included county health and human services staff, Valley Packaging Inc., ESTHER (faith-based org), Wisconsin Department of Workforce Development, Making the Ride Happen (non-profit), Casa Hispana, Appleton School District, World Relief, Partnership Community Health Center (non-profit), Fox Valley Tech College, Fox Cities Chamber, United Way and Hmong American Partnership.

The TDP process occurs every 5 years. The results of the TDP drive Valley Transit major planning and policy decisions, so we place added effort to engage public participation during this critical process. Valley Transit will continue to work with our MPO to develop and implement public engagement techniques for each planning process.

Valley Transit's ongoing public outreach efforts to engage the entire community, including minority and LEP populations, are led by our mobility manager. This position is tasked with partnering with community-based organizations, participating in community events/meetings and many other forms of continuous outreach. Evidence of outreach efforts is found in the table under 'Public Outreach Activities' later in this document. Valley Transit' travel trainer position also plays a role in community outreach by participating in events/meetings and providing travel training resources to individuals and organizations across the Fox Cities. This direct staff contact with individuals and groups invites active participation and communication of transit issues.

Strategies and Desired Outcomes

To promote inclusive public participation, Valley Transit will employ the following strategies, as appropriate:

- ✓ Provide for early, frequent, and continuous engagement by the public
- ✓ Select accessible and varied meeting locations and times
- ✓ Employ different meeting sizes and formats
- ✓ Provide food during meetings, if possible
- ✓ Use social media in addition to other resources to gain public involvement

- ✓ Direct participation in local groups and efforts to improve communication with hard-to-reach populations
- ✓ Expand traditional outreach methods by visiting ethnic stores/markets and restaurants, community centers, libraries, faith-based institutions, local festivals, etc.

Public Outreach Activities

Valley Transit maintains a log/record of the various types of outreach activities it uses to promote inclusive public participation. On an annual basis, Valley Transit reviews its log of outreach activities to determine if additional or different strategies are needed to promote inclusive public participation.

The direct public outreach and involvement activities conducted by Valley Transit & ECWRPC are summarized in the table below. Efforts include *meetings, surveys, focus groups, attendance at community events, etc.*

Event Date	Valley Transit Staffer(s)	Event	Date Publicized and Communication Method	Outreach Method	Notes
9/7/19	ECWRPC Staff	Latinofest	Event Promotion	Booth at Event	TDP input
9/23/19	ECWRPC Staff	Booth at Appleton Public Library	Posters, handouts & social media	Booth	TDP input
9/28/19	ECWRPC Staff	City of Neenah Farmer's Market	Event Promotion	Booth	TDP input
11/15/19	ECWRPC Staff	City of Kaukauna Open House	City Website	Booth	TDP input
11/18/19	ECWRPC Staff	City of Grand Chute Open House	City Website	Booth	TDP input
Monthly	VT Mang. Team	Fox Cities Transit Commission	Published on website 4 days prior to meeting	Meeting	2 nd or 4 th Tuesday
2019-2022	VT MM	World Relief	Frequently	Meetings and Travel Training Partners	Refugee needs for Transportation, Group trainings, volunteer training, PITT Crew
2019	VT MM	Leaven/SVDP/Partnership Community Health		Experience/exposure to the bus	Key organizations serving Latinex communities and partners for VT
2019	VT MM	Hispanic/Latino Transportation Meeting at Leaven		Meeting	
2020	VT MM	Fox Valley Literacy Council Staff Presentation		Meeting	Assisting minority populations with reading, communicating, translating, etc
2019/2020/2021	VT MM & TT	Hispanic Interagency Meetings	Monthly	Meeting	Member
2020/2021	VT MM	Access Committee - Serving Minorities	Weekly through COVID	Meeting	Member

2021	VT MM	Racial Equity Discussion		Meeting	Networking to understand BIPOC communities
2021	VT MM	APTA Diversity & Inclusion Committee Meeting		Meeting	communities
2020/2021	VT MM	Imagine Fox Cities Belonging Committee	Monthly	Meeting	Member
2021	VT MM	CORE GARE Meeting/Equitable Transportation Workgroup	Monthly		
2021	VT MM	Transit Talk - WACMAA		Meetings (3)	Hmong Elder Transportation Solutions
2021	VT MM	Panelist for Racial Equity in the Workplace		Presenter	Hosted by POINTTERS, Inc.
2019/2021/2022	VT MM	SHRM - Diversity & Inclusion in the Workplace Event	Monthly	Member	Valley Transit's partnership with HR Professionals who are seeking transportation for employee attraction and retention
2021/2022	VT MM	Connecting Communities		Meeting	establish relationships in the Hmong Community
2021	VT MM	ABC Staffing/FVTC		Meeting	Connecting the Hmong Community to FVTC for Hmong students connection to employment opportunities
2021	VT MM	UW-Fox Valley		Meeting	Kings Education through UW-Fox Valley who host international students
2021	VT MM	People of Progression/Harbor House		Meeting	
2021	VT MM & TT	FVTC International Student Presentation		Presentation	Class of International Students at FVTC
2021	VT MM & TT	Harbor House Advocate Training w/Hmong Advocate on staff		Meeting/Experience	Ride the bus/transit center tour
2021	VT MM & TT	Even Start Intro and tour		Meeting	
2021/2022	VT MM & TT	FVTC International Student Bus Training		Presentation/Experiences (3)	Presented to classes of International Students at FVTC and rode the bus to transit center for a tour
2021	VT MM & TT	Winnebago County Diversity Affairs		Meeting	
2021/2022	VT MM & TT	Even Start Presentation and role play		Presentation/Role-play	Students at Even Start are unable to leave the property, so we offered a role-play on "How to ride the bus"

Language Assistance Plan

Plan Components

As a recipient of federal US DOT funding, Valley Transit is required to take reasonable steps to ensure meaningful access to our programs and activities by limited-English proficient (LEP) persons.

Limited English Proficient (LEP) refers to persons for whom English is not their primary language and who have a limited ability to read, write, speak or understand English. This includes those who have reported to the U.S. Census that they speak English less than very well, not well, or not at all.

Valley Transit's Language Assistance Plan includes the following elements:

- 1. The results of the *Four Factor Analysis*, including a description of the LEP population(s), served.
- 2. A description of how language assistance services are provided by language
- 3. A description of how LEP persons are informed of the availability of language assistance service
- 4. A description of how the language assistance plan is monitored and updated
- 5. A description of how employees are trained to provide language assistance to LEP persons
- 6. Additional information deemed necessary

Methodology

To determine if an individual is entitled to language assistance and what specific services are appropriate, Valley Transit has conducted a *Four Factor Analysis*¹ of the following areas: 1) Demography, 2) Frequency, 3) Importance and 4) Resources and Costs.

LEP Four Factor Analysis

Factor 1: Demography: Identifies the number or proportion of LEP persons served and the languages spoken in the service area.

The first factor of the *Four Factor Analysis* is the basis of the Language Assistance Plan. It requires Valley Transit to review its US Census data to determine if it meets the *LEP Safe Harbor Threshold*.

US Census and American Community Survey (ACS) Data²

Valley Transit did the following:

- 1. Inserted county LEP data in the Title VI plan.
- 2. Analyzed the LEP demographic data for Valley Transit's program and/or service area by calculating the *Safe Harbor Threshold* for two to three of the largest language groups identified other than English. All data was provided by ECWRPC using the US Census Bureau website as the source.
 - a. The *Safe Harbor Threshold* is calculated by dividing the population estimate for a language group that "Speaks English less than very well" by the total population of the county.
 - i. The LEP Safe Harbor Threshold provision stipulates that for each LEP group that meets the LEP language threshold (5% or 1,000 individuals, whichever is less of

¹ DOT LEP guidance <u>https://www.transportation.gov/civil-rights/civil-rights-awareness-enforcement/dots-lep-guidance</u>

² https://www.census.gov/programs-surveys/acs

the population to be served) Valley Transit must provide translation of vital documents in written format for the non-English users.

- ii. Examples of written translation of vital documents include the Title VI policy statement and/or Notice to the Public, Title VI Complaint Procedure, Title VI Complaint Form, and ADA paratransit eligibility forms.
- 3. Explained the results of the analysis of the county LEP data in the demographic section of the *Four Factor Analysis.*

Factor 2: Frequency: Identifies the frequency staff (and transit provider/lessee, if applicable) comes into contact with LEP persons.

LEP persons are persons identified as speaking English less than very well, not well or not at all. Just because a person speaks a language other than English doesn't mean they don't speak English or are identified as LEP.

The summary below discusses the frequency with which Valley Transit staff, and/or its contractor/lessee come into contact with LEP persons. It also provides information on the how staff is instructed to meet the needs of LEP persons. Valley Transit staff persons use all available resources to assist LEP persons.

Factor 3: Importance: Explains how the program, service or activity affects people's lives.

The summary below discusses how Valley Transit's program and services impact the lives of persons within the community. Valley Transit will specify the community organizations that serve LEP persons, if available.

Factor 4: Resources and Costs: Discusses funding and other resources available for LEP outreach.

The summary below discusses the methods Valley Transit uses to provide outreach to LEP persons as well as train staff (and transit provider/lessee, if applicable) on Title VI and LEP principles.

Additional Required Elements

In addition to the Four Factor Analysis, Valley Transit addresses the following elements:

A description of how language assistance services are provided by language

A description of how LEP persons are informed of the availability of language assistance service

A description of how the language assistance plan is monitored and updated

A description of how employees are trained to provide language assistance to LEP persons *And, any additional information deemed necessary.*

Valley Transit – Summary of the Language Assistance Plan Components

Item #1 – Results of the Four Factor Analysis (including a description of the LEP population(s) served)

Factor 1 – **Demography**

The US Census Bureau – American Community Survey (2015-2019) reports there are numerous languages spoken in Calumet, Outagamie and Winnebago Counties. Some of these languages include Spanish, Indo-European languages, Asian and Pacific Islander languages, and other languages. After English, the second largest language group is Spanish followed by Asian and Pacific Islander languages.

The Safe Harbor Threshold is calculated by dividing the population estimate for a language group that "speaks English less then very well" by the total population of the county. The LEP Safe Harbor Threshold provision stipulates that for each LEP group that meets the LEP language threshold (5% or 1,000 individuals, whichever is less), Valley Transit must provide an appropriate level of assistance for qualifying LEP groups.

In Valley Transit's tri-county area (Calumet, Outagamie and Winnebago Counties), 10,871 persons (3%) have identified themselves as Spanish speaking and "speaks English less than well"; 8,408 persons (2%) have identified themselves as Asian & Pacific Islander (including Hmong) speaking and "speaks English less than well."

The 5% threshold was not met for Spanish or Asian population groups in the tri-county area. However, both groups have more than 1,000 individuals.

Factor 2 – Frequency

Valley Transit with assistance from our service contractors tracks the number of encounters with LEP persons and considers adjustments as needed to its outreach efforts to ensure meaningful access to all persons and specifically to LEP and minority populations of Valley Transit's programs and services.

Valley Transit's log of LEP interactions and assistance provided to individuals is used to ensure resources are available to address needs. Over the last 3 years, we have worked with thirty LEP persons by providing support or direct travel training sessions. Over 60% of these LEP interactions speak Spanish. The remaining interactions involve infrequent contact with Swahili, Kinyarwanda and Dari. These interactions primarily result from refugee placements in the area by World Relief.

Factor 3 – Importance

Valley Transit understands an LEP person with language barrier challenges also faces difficulties obtaining health care, education, access to employment and nutrition meal sites, recreational services and socialization. A network of community support and an accessible transportation system is a key link to connecting LEP persons to these essential services.

Valley Transit continually identifies the activities and services which would have serious consequences to individuals if language barriers prevented access to information or the benefits of those programs. Valley Transit will continue to work with the community coalitions to determine how to overcome barriers to accessing these items.

Factor 4 – Resources and Costs

Even though Valley Transit does not have a separate budget for LEP outreach, Valley Transit works to implement low-cost methods to reach LEP persons. This includes interpretation services, translation of some written materials and outreach activities focused on reaching LEP persons.

Valley Transit conducts outreach activities by working with community ethnic organizations/coalitions and the City of Appleton's Diversity Coordinator who manages all contracts and communications as they relate to interpreter services.

Valley Transit employs a mobility manager and travel trainer. These positions represent a significant investment and provide direct support to any community member that needs transportation service. Both positions routinely participate with organizations that represent LEP persons and provide one-on-one travel training assistance to community members, including LEP persons. Our travel trainer is bilingual (Spanish) and since most of our LEP encounters are Spanish speaking individuals, Valley Transit can resolve each case quickly to provide the assistance needed. Infrequent encounters with various other languages are handled with interpretation services and supported by our travel trainer when bus or other Valley Transit service is needed.

Valley Transit experiences a low frequency of LEP encounters. Valley Transit had previously translated and printed rider's guides and other materials for Spanish populations. Due to low demand/usage, this was discontinued. The printing and distribution costs made it difficult to justify continued reprints to keep the information up to date. Fox Valley Technical College, a major resource in the region for teaching English as a second language, recommended focusing on simple or basic English in written materials vs. translation to another language. Valley Transit will continue to review this area to determine if a greater need exists that would warrant a different approach. Based on continual outreach, LEP encounters and previous experience, Valley Transit has determined that translation of written documents is not warranted and reliance upon other resources is a better option. If requests for translation of written materials increases significantly, Valley Transit will reconsider translation and printing of written documents.

We have found that participation in the network of organizations that work with LEP persons is a much better investment for limited resources. Our community has several programs and coalitions that work towards supporting LEP individuals.

For planning outreach, Valley Transit's MPO, East Central Wisconsin Regional Planning Commission (ECWRPC), will also continually assess this area to determine how they can support Valley Transit for transportation-related planning. ECWRPC has an additional focus on public outreach and inclusivity as it relates to regional transportation planning.

Description of how Language Assistance Services are Provided, by Language

- Examine records to see if requests for language assistance have been received in the past, either at meetings or over the phone, to determine whether language assistance might be needed at future events.
- ✓ When Valley Transit sponsors an event, have a staff person greet participants as they arrive. By informally engaging participants in conversation, it is possible to gauge each attendee's ability to speak and understand English. Attendees at FCTC meetings are greeted to learn if support is needed.
- ✓ Vehicle operators, travel trainer, dispatchers and other front-line staff are provided opportunities to share their experience concerning any contacts with LEP persons to ensure resources are provided.
- ✓ Front-line staff that carry issued cell phones with the Google Translate App downloaded. This app allows users to enter text or use voice to translate between multiple languages. Service also available on PCs at main office and downtown transit center. Drivers that need support radio for supervisor support at transit center or where appropriate.
- ✓ Travel Trainer position is bi-lingual (English & Spanish), which is an in-house resource for Spanish language assistance.

✓ Contracted interpretation services are used by support and travel trainer.

Description of how LEP Persons are Informed of the Availability of Language Assistance Service

Valley Transit does the following to inform LEP persons of the availability of language assistance services:

- ✓ Review outreach activities and the frequency of contact with LEP individuals to determine whether additional language assistance services are needed.
- ✓ Individualized travel training is provided with contracted interpretation services
- ✓ Partnering agencies with Valley Transit help inform their constituents of transit services and how to reach out to Valley Transit for more information
- ✓ The Valley Transit website uses the "Google Translate" translation service. This service allows users to translate any, or all, parts of the website into their native language. Additional accessibility is provided by accessiBe plug-in service.
- ✓ Utilize pictograms and other symbols on travel cards to assist LEP persons with bus route information.
- ✓ Utilize Wisconsin Relay 7-1-1, the state of Wisconsin resource to assist with communication needs <u>http://www.wisconsinrelay.com/spanish.html</u> and <u>http://www.wisconsinrelay.com/</u>
- ✓ ECWRPC conducts many ongoing events and outreach efforts that include the topic of public transportation in the Fox Cities region. ECWRPC specializes in gathering public input from all groups, including LEP persons. As ECWRPC encounters LEP persons, they connect them with the appropriate language assistance service and discuss lessons-learned in this area with Valley Transit.

Description of how the Language Assistance Plan is Monitored and Updated

Valley Transit reviews its plan on an annual basis or more frequently as needed. Valley Transit will evaluate the information collected on encounters with LEP persons as well as public outreach efforts to determine if adjustments should be made to the delivering of programs and services to ensure meaningful access to minority and LEP persons.

Valley Transit meets with contracted service providers on an annual basis to ensure the Title VI requirements are met on an annual basis to ensure the Title VI requirements are met. Valley Transit partners with East Central Wisconsin Regional Planning Commission (ECWRPC) to support applicable subrecipients in developing/updating a Title VI Program and compliance with requirements. WisDOT has provided subrecipients statewide with a Title VI Program template to help ensure all required elements are contained within the plan. To monitor compliance, Valley Transit meets with subrecipients quarterly, works with ECWRPC to schedule plan updates and forwards subrecipient Title VI information to the FTA, when requested.

ECWRPC assists Valley Transit with development of this plan and updates when needed.

Description of how Employees are Trained to Provide Language Assistance to LEP Persons

Each year, Valley Transit will review the principles of Title VI and Valley Transit's Language Assistance Plan with its employees. Valley Transit will ensure that our contracted service providers also educate their staff on Title VI requirements, and specifically LEP provisions.

The following training will be provided:

- ✓ Information on the Valley Transit Title VI Program and LEP responsibilities.
- ✓ Description of language assistance services offered to the public.
- ✓ Documentation of language assistance requests.
- ✓ How to handle a potential Title VI complaint.

If a driver, dispatcher or other team member needs further assistance related to LEP individuals, the Valley Transit management team will identify strategies to meet the language needs of the participants of the program or service.

Valley Transit has an open-door policy and will provide rides to any person who requests a ride. If an individual has speech limitations, the dispatcher or driver will work with Valley Transit to ensure the individual receives access to the transportation service.

Valley Transit drivers and staff contact supervisor(s) on duty for assistance with LEP persons. If possible, the Google Translate App is used. If further assistance is needed, supervisor will contact our Mobility Manager or Travel Trainer positions to assist the LEP person with appropriate support.

As part of the annual site visit process, Valley Transit will discuss updates to the Language Assistance Plan with its subrecipients and contracted service providers.

Minority Representation Information

A. Minority Representation Table³

The table below depicts Valley Transit's non-elected commissioners on the Fox Cities Transit Commission (FCTC). *Note: Percentages do not add up to 100%, because "Hispanic" is an ethnicity, not a race.*

County/ Body	White Alone	Black or African American Alone	American Indian and Alaskan Native Alone	Asian, Native Hawaiian and Other Pacific Islander Alone	Some Other Race Alone	Two or More Races	Hispanic
Calumet County	88.7%	0.8%	0.5%	2.5%	2.9%	4.6%	5.4%
Outagamie County	86.0%	1.6%	1.6%	3.6%	2.0%	5.3%	4.9%
Winnebago County	86.2%	3.0%	0.7%	3.3%	1.8%	5.1%	4.8%
FCTC*	46%	0%	0%	15%	0%	0%	0%

*39% did not respond to data request

B. Efforts to Encourage Minority Participation

Valley Transit understands diverse representation on committees, councils and boards results in sound policy reflective of its entire population. As vacancies on boards, committees and councils become available, Valley Transit will make efforts to encourage and promote diversity.

To encourage participation on its boards, committees and councils, Valley Transit will continue to reach out to community, ethnic and faith-based organizations to connect with all populations. In addition, Valley Transit will use creative ways to make participating realistic and reasonable. Such as, scheduling meetings at

³ Data source for counties is 2020 Census. FCTC data was collected with a "Minority Representation Data Collection Form" and represents completed forms from commissioners that opted to self-identify.

times best suited to its members, offering a web-based participation option (when possible) and providing transportation, if needed for its members.

Facility Location Equity Analysis

Valley Transit has no current plans to construct a new facility or any recent facility construction projects.

Fixed Route Service Standards

Vehicle Load Standards

1. Expressed in writing

The average of all loads during the peak operating period should not exceed vehicles' achievable capacities, which are 30 passengers for a 26-foot bus, 58 passengers for 35-foot buses, and 69 passengers for standard 40-foot buses.

2. Expressed in tabular format

Vehicle		Average Passenger Capacities					
Туре	Number in fleet	Seated	Standing	Total	Wheelchair Capacity	Total Capacity With Wheelchairs	
26' Glaval	1	20	10	30	2	26	
35' New Flyer	16	31	27	58	2	54	
40' New Flyer	12	39	30	69	2	64	

Vehicle Headway Standards

1. Expressed in writing

Vehicle Headway is the length of time it takes between two buses traveling in the same direction on a particular route. Valley Transit's buses are scheduled with either 30- or 60-minute headways. If peak service is available, some hour-long routes run with 30-minute headways.

2. Expressed in tabular format

	Weekday Peak	WEEKDAY OFF-	SATURDAY	CDECIAL NOTES				
Route(s)	Service	PEAK SERVICE	Service	Special Notes				
1, 2, 3, 4 & 5	60 Minutes	60 Minutes	60 Minutes					
9	30 Minutes	30 Minutes	30 Minutes					
12, 15, 20, 30 & 41	60 Minutes	60 Minutes	60 Minutes					
6	N/A	60 Minutes	60 Minutes	Begins service at 5:45 p.m. M-F				
8	60 Minutes	60 Minutes	N/A	Last route leaves at 4:45 p.m. M-F				
11	60 Minutes	60 minutes	N/A	Last route leaves at 4:15 p.m. M-F				
16	60 Minutes	60 Minutes	N/A	Last route leaves at 4:45 p.m. M-F				
19	N/A	60 Minutes	60 Minutes	Begins service at 5:15 p.m. M-F				
31	60 Minutes	60 Minutes	60 Minutes	Last route leaves at 5:15 p.m. M-F				
32	60 Minutes	60 Minutes	60 Minutes	Last route leaves at 5:45 p.m. M-F				

On-Time Performance Standards

One of the most important service standards is On-Time Performance or adherence to published schedules.

- A Valley Transit bus is considered on-time if it departs a scheduled time point no more than 1 minute early or more than 5 minutes late.
- Valley Transit's On-Time Performance objective is 90% or greater.

Valley Transit continuously monitors on-time performance and system results are published as part of a quarterly key performance indicators report covering the reliability, quality and safety of operations.

Service Availability Standards

Valley Transit currently provides service to most major destinations and large employment centers within the communities that it serves. Valley Transit's 5-year Transit Development Plan (TDP) analyzes regional mobility and reassesses all service standards. The TDP reviews coverage of service by regional employment centers, population, households without a car, income and other community demographics that may indicate propensity to use public transit. Valley Transit reviews its level of service to each community during each TDP process and discusses expansion opportunities when additional resources become available. Route planning focuses on placing new service within ¼ mile from densely populated areas that have a high propensity for transit usage. Valley Transit optimizes the funding and resources that it receives from the partner communities to maximize its route coverage within these communities and transit-supportive areas.

Fixed Route Service Policy

Vehicle Assignment Policy

Valley Transit frequently reviews the ridership of its routes and assigns the larger and smaller capacity buses to the areas whose ridership best matches these capacity characteristics. Vehicles are assigned according to route capacity and rotated with the service group daily.

Transit Amenities Policy

Valley Transit has over 950 formal bus stop locations, many of which have been at the same location for more than forty years. In 2021, all stops were re-signed with more visible signage that included the route number(s) that service the stop and contact info.

Valley Transit places bus stops every 2-3 blocks (approximately) and near major trip generators. 45 locations also include a bus shelter. Bus shelters are located throughout the service area. These shelters have also been in place for many years. As funding becomes available, old shelters are being replaced with new, accessible shelters.

Additional shelter locations can be requested by contacting Valley Transit. New installations are dependent on the ability to obtain the necessary right of way to locate the shelter and a sponsoring business or other entity to maintain and provide snow removal, if possible. Valley Transit utilizes passenger count data by location to prioritize locations with highest usage. Valley Transit also reviews accessibility, socio-economic and minority population data prior to installing a new shelter.

#5-R-22 Water Main Resolution

Submitted By: Alderperson Doran, District 15 Date: April 20, 2022 Referred To: Department of Public Works

Whereas the City of Appleton as a local unit of government has a primary expectation to provide basic infrastructure and public safety services for the community and;

Whereas the City of Appleton is falling behind its goals and expectations for road and utility infrastructure, borrowing for roughly 80% of annual road projects and experiencing a near record amount of water main breaks in 2021, costing the city \$1.2 million dollars to fix, demonstrating an immense and necessary response to a problem that has been pushed off for too long and;

Whereas a 2019 consultant report outlined improvements to water utility infrastructure in Appleton, noting the city should replace more than 30 miles of water mains between 2020-2024, but has completed roughly just five miles so far and;

Whereas the city has roughly four miles of four inch water mains and 35 miles of six inch water mains remaining in service, as opposed to the eight inch water mains throughout the rest of the city that have been standard since at least the 1980s, creating a service equity issue and;

Whereas all of these examples should compel us as elected officials to take swift and immediate action to fund these critical services the city provides;

Therefore be it resolved to address this most basic of service equity issues, the Common Council directs the city staff to reallocate \$6 million in American Rescue Plan Act funds to the replacement of first, the remaining four inch water mains in the city and then six inch water mains to match the eight inch standard throughout the remainder of the city and;

Be it further resolved that wherever practical, locations where those water mains can be replaced in the terraces are prioritized over locations that will require corresponding street reconstruction, with the projects timed to meet the federal deadline for using ARPA funds.

MEMO

...meeting community needs...enhancing quality of life."

SUBJECT:	Resolution #5-R-22 regarding the reallocation of ARPA funds to undersized watermain replacement.
DATE:	May 12, 2022
FROM:	Paula Vandehey, Director of Public Works TAV
TO:	Finance Committee Utilities Committee

It is important to start first by acknowledging that we are not replacing as much infrastructure as we should be based on its age and condition. This underfunding was discussed as part of the 2022 Budget process. The controlling factor is not the Utility Budgets, but instead the General Fund Budget driven by declining municipal revenue when adjusted for inflation. In other words, we have capacity within the water, wastewater and stormwater budgets to replace the underground infrastructure, but do not have the corresponding capacity within the General Fund Budget to complete the pavement, sidewalk and driveway apron portions of the projects.

As part of the 2022 Budget process, the City held listening sessions to gather input on how we should allocate our \$14.9 million ARPA funds. Based on that feedback the Council approved spending the funds as shown on Page 71 of the 2022 Budget (Exhibit A attached). This Resolution requests a re-allocation of \$6 million of the \$8 million in American Rescue Plan Act funds to the replacement of undersized watermain.

Following are responses to questions we have received regarding this Resolution along with additional information we believe is relevant to the discussion.

- What are the miles of undersized watermain remaining in the city?
 3.77 miles of 4" and smaller watermain
 33.17 miles of 6" watermain
- 2. What is the estimated cost to replace those remaining miles of undersized watermain?

\$3.6 million to replace 4" and smaller watermain \$31.5 million to replace 6" watermain 3. How many miles of the undersized watermain could be replaced within the terrace without going into the street?

This is an unknown at this time as we will need to complete utility locates, survey and design for all 37 miles in order to accurately answer this question. Also, water services may need to be replaced at the same time the watermain is replaced which can only be done by excavating the street. (An example of a terrace watermain project with service replacement is attached as Exhibit B)

4. Are we already correlating street reconstruction with the presence of the undersized watermains whenever possible?

Yes. As shown on Exhibit C almost all of the 2022 Watermain Projects include replacing undersized watermain.

- 5. Is there any estimate of when we would complete the replacement of the undersized watermains under our current funding levels? At our current rate we anticipate it will take another 20 years before all undersized watermains are replaced.
- 6. Can ARPA funds be used for the pavement replacement associated with the watermain relay projects?

Yes, the guidelines for these funds were expanded to include street reconstruction project costs.

7. How many streets would be affected in terms of being patched for a longer period of time than the standard year between underground utility work and pavement reconstruction?

It depends on how many miles of the undersized watermain can be relayed within the terrace area. Worst case is 37 miles of roadway (10% of our road network) would have long-term patches.

8. Are the sanitary sewer and storm sewer also in need of replacement on these same miles of street?

Yes, for the majority of the streets sanitary and/or storm also should be relayed.

9. Are there any concerns with material supply at this time?

Yes. We have been notified that hydrants and other components of watermain relay projects are 6 months out from time of order.

10. Assuming the \$6 million is reallocated to undersized watermain replacement, how soon would this project go out to bid?

Spring of 2023. Assuming there are no material supply shortages (though we are already experiencing shortages and long lead times in certain products), we would complete this work in 2023. Availability of materials would impact project timing, though it is not possible to predict duration of potential delays.

11. What factors go into prioritizing watermain projects?

The following factors are used to determine the priority of watermain projects:

- > If the street is scheduled for reconstruction
- Age of the watermain. We have many miles of 8" watermain that is 90+ years old.
- Condition of the watermain. Watermain may be adequately sized and only 50 years old but has a long history of watermain breaks.
- Redundancy. Some streets do not have watermain and adding watermain along those streets improves circulation and provides redundancy to the network.

12. What are the options available to Council if these funds are reallocated to infrastructure?

- One option is to relay as much undersized watermain as possible and install permanent trench patching the following year. We estimate 6 miles of watermain could be replaced under this option.
- One option is to select a few projects and complete all underground utilities as well as pavement reconstruction. We estimate 1 mile of sanitary, storm, watermain and new pavement could be replaced under this option.
- 13. Did the Common Council have this information when it allocated the ARPA funds?

Yes. The watermain break log is shared at Utilities Committee monthly. We also discussed the need to prioritize infrastructure as part of the 2022 Budget process.

14. How does Appleton compare to similar municipalities as far as infrastructure maintenance goes?

According to the Water Research Foundation, communities in the United States average 25 main breaks per 100 miles per year. Since 2000, the City of Appleton has averaged approximately 25 main breaks per 100 miles per year (average of 95.5 main breaks per year 2000-2021).

However, the Water Research Foundation identifies the "optimized distribution failure frequency" at 15 breaks per 100 miles of watermain.

15. How does Appleton compare to similar cities on the amount of watermain replaced annually?

The industry standard is to replace 1% of your water infrastructure annually. For Appleton that would mean replacing 3.6 miles each year. In comparison we have been replacing 0.8% on an average annual basis.

However, because of our corrosive soils, pipe material and pipe age, our Water System Master Plan completed by AECOM in 2019 recommended replacing 6+ miles (1.7%) annually.

16. How many complaints has the city received about undersized mains?

Very few complaints are received from residents regarding undersized watermain. In fact, Fair Street is the only project currently in the 5-Year Plan based on complaints regarding undersized watermain.

17. Why doesn't the City just dedicate more General Fund money to infrastructure? Although the Department of Public Works would advocate for more General Fund dollars to be allocated to street reconstruction, we understand that there are many competing interests for these funds. Allocating more funds to infrastructure means allocating fewer funds to other departments and programs. The budget process is the method by which the City Council prioritizes these competing interests.

18. How much does the city spend, on average, repairing watermain breaks?

On average, the city spends approximately \$1 million annually repairing main breaks.

19. Is the City in trouble with higher number of breaks this last 12 months?

City resources are allocated to watermain breaks as a high priority. Under current staffing and funding models, the city has been able to keep up with the greater-thanaverage number of main breaks this year. That being said, if staff is repairing a watermain break then they are not doing other routine maintenance such as exercising valves and flushing hydrants, nor proactively searching for leaking services and mains.
