

Who we are/Who Chadwick's is...
Jen Thomas & Phil Carroll
413 W. College Ave.

2001: Jen and Phil met at UWO, both design majors

2002-2012: Phil worked with/for Tom Taggart, the owner of Molly McGuire's, CBCs and French Quarter

2002-2009: Jen managed Hollister & Abercrombie and Fitch in the Fox River Mall

2009-Present Day: Jen managed/manages Chadwicks

2010: Jen/Phil moved to Appleton and purchased a home

2010-2018: Phil was still working with Tom, the Castle family and shooting Wedding Photography and Videography in Milwaukee

2018: Chadwick unexpectedly passed away. Officer Steinke arrived on scene that night and suggested Jen be the acting agent on the liquor license which led to purchasing the business and building

Late 2018: Phil/Jen bought Chadwicks; the business and building under separate LLCs

2021-2022: Hired a contractor to start renovating 413 upstairs, possibly expand in some capacity

2023: Met with Accountant to pay off the building in full so plans could move forward with renovations for a new entrance and a reface of building

2023: Issues with underage kids with fake IDs - All progress possibly halted

We have a combined knowledge of over thirty years in the service/bar industry

We live here and are invested here. We care about the business, community and safety of our patrons. We have been a Lead Venue for 9 years of Mile of Music, participate in various ADI events and host many private events such as local benefits/fundraisers, Wedding & Baby Showers/Receptions & company parties. We have a staff of around 20; most of which have been with us 3-4+ years.

Hopefully this timeline will help bring validation to the points and issues we will be discussing today.

Hi Philip,

It was a pleasure speaking with you today. As we discussed, Intellicheck is used across the country as the preferred ID verification solution by establishments like yours to ensure that underage guest is not inadvertently sold age-restricted products. The exact same Mobile app we discussed for your establishment is also used in the field by Law enforcement.

Law enforcement uses us, just as an example we did an ID verification test with the New York State DMV with about 1000 ID's and caught every single one.

Fakes have gotten so good that Law enforcement can't even eyeball it anymore and that's why they use Intellicheck. We don't have competitors because every other ID scanner only compares the front of the ID to a template. This does nothing for you and still puts you at risk of getting busted by law enforcement

What we do is we validate that the barcode is coded and formatted correctly as well as making sure the hidden security features line up. Bottom line, templated barcodes like the other apps out there don't work with us, and we are the only ones that can say that.

Below i have attached a video as well that will show you how well intellicheck works.

Can a mobile app (iOS, Android) catch fake IDs?

Mobile apps can catch some percentage of fake IDs using 2D barcode security checks. 2D barcode security (sometimes called “ID validation”) performs a series of checks on the information on the 2D barcode. These checks are for fake ID “tells” such as mis-spellings, using incorrect abbreviations (ex. shortening Brown to “BWN” instead of “BRN”), size, and location of the barcode. Many low quality fakes cannot pass these barcode security checks, and so apps that read only the 2D barcode (mobile apps and ID scanning software running on a mobile device) can catch these.

However, we have compared the results of some of the most commonly used mobile apps which claim to verify age and detect fakes. **They caught less than 35% of the fakes in our library**, and some of the apps caught none at all.

Quickly Scans All Drivers Licenses & Passports

Reads in Less than 1 Second

Add to Cart

Simple point-and-shoot Barcode Scanner reads all

Features

- Mobile ID scanning using a handheld ID scanner
- Sync multiple scanners to centralized visitor management system
- Scan all passports, drivers' licenses, US military ID cards, permanent resident cards and other state and government-issued ID cards
- Age verification, custom grouping, and history export
- Versatile data collection. Able to read 1D/2D barcodes from the screens of mobile devices, magnetic card reading is available via optional MSR
- USB 2.0 port for data transfer
- Offline capabilities: scan IDs without an internet connection
- Email and SMS notifications
- Heavy-duty protection. Sealed against dust, water spills, and moisture, IP65 and IP67 rating
